# Write for our newsletter's most popular feature

Project Title	Write for our newsletter's most popular feature
Summary	Write and edit for the NIST Material Measurement Lab's weekly internal newsletter.  Learn about the work of our scientists and other staff members by writing the MML Random Interview, our most popular feature.
Country	United States

#### **Project Description**

MML Notes is a weekly internal newsletter sent to nearly 1,000 NIST employees and other subscribers to keep them informed of events, technical achievements, awards, interactions with stakeholders, and more. The intern will collect submissions, edit them lightly, and categorize them. The intern will also interview and edit the MML Random Interview, our most popular feature. The MML Random Interview uses a random number generator to choose staff members to interview. You will learn about work in all fields, including biology, chemistry, materials science, computer science, and data science, as well as about the great support staff that keep this acclaimed national lab running smoothly.

#### **Required Skills or Interests**

Skill(s)
Editing and proofreading
Writing
